Light cruiser, 1915

# WIESBADEN

Легкий крейсер

«ВИСБАДЕН»

Германия, 1915

Головной корабль в серии из двух легких крейсеров германского флота, ставшей развитием типа «Граудениц». Стал первым германским легким крейсером, изначально получившим вооружение из 150-мм орудий, а также первым оснащенным турбинами с непрямой передачей на

валы. Заложен в 1913 г. Спущен на воду 30.01.1915. Вступил в строй 23.08.1915. Во время Ютландского сражения вел огневую дуэль с британским крейсером «Честер», в ходе которой получил тяжелые повреждения. После попадания в турбинное отделение лишился хода, и под огнем

других британских кораблей быстро превратился в груды искореженного металла, хотя и продолжал оставаться на плаву. Его добил торпедами британский эсминец «Онслоу». Но даже после этого агония крейсера продолжалась более двух часов. Вместе с кораблем погибло 584 человека.
